ACRYLIC SIGNAGE Media Signs

Signs can be advertising — such as a billboard or a sign outside a place of business. Buildings need signs to point visitors to certain areas such as the lobby, the lounge, the exits, the elevators. Exhibitors at conventions and trade shows need signs. Cities and states need road signs.

Signs can be informational — serve to give directions that points the way to residences in a condominium, house numbers, room numbers for hotels, offices in an office building, shops in a mall, car parks and to any company that needs a logo and company name at their door or building. Signs is a form of identity and what better way to show it using acrylic that is weather-proof, colourful, 3 dimensional and easily lighted up at night.

Capabilities of Laser Cutting and CNC Routing Machines

We have extended our business to provide laser cutting and design service that allows you to realize intricate designs that are too complex to create by hand. We can laser cut almost anything that you can draw - sharp angles, smooth curves, complex architectural designs, engineering parts, laser engrave text, symbols, logos... Simply any signs!

The difference between WORLDBIZZ and the rest of sign-makers, is our long years of experience working with thick acrylic panels in the construction field, our expertise in dome forming shape, the art of chemical welding for longer panels over 8 meters and thermal forming to any shapes and sizes. In short, **WORLDBIZZ brings the “cutting edge” to the CONSTRUCTION & BUILDING INDUSTRY.**
